

Online Transportation Information System (OTIS)

Live August 27th

OTIS (Online Transportation Information System) is now available to our external web users! This new integrates multiple applications and provides easy to use selection tools to quickly find various roadway data.

OTIS will be the One Stop Shop access point to information frequently used for transportation planning and project development.

Information available includes:

- Traffic Counts and Statistics
- State Highway Attributes
- Roadway Statistics
- State Highway Videologs
- Demographics
- Geographic Data
- Maps

CDOT website links to OTIS are found:

- **Main Web Page** – Look for our new graphic at <http://www.coloradodot.info/>

- **Business Center Tab** - <http://www.coloradodot.info/business>

- **Library Tab** - <http://www.coloradodot.info/library>

Sign Library	For Downloads (SignCAD and PDF)
